

Corporate Profile

METALCORP
Everything in Steel
The Rural Brand for the Land

we'll see it through...

More than a tag line to our Orrcon Steel brand

It is a statement that says a lot about our business and the people that work in it. Being part of our culture, it reflects our relationship both internally and externally.

Orrcon Steel and Metalcorp employ over 600 Australians who use their steel industry knowledge and experience to produce and supply reliable steel products.

When buying Australian made Orrcon Steel, there is traceability through our distribution centres, branches and stockists to the mill rolling and original steel coils.

Orrcon Steel's Hollow Structural Sections manufactured in Salisbury are certified by the Australasian Certification Authority for Reinforcing and Structural Steels (ACRS).

Importantly, we have our own on-site laboratory that is accredited by the National Association of Testing Authorities (NATA) for Mechanical and Chemical testing.

Orrcon Steel has a range of certifications and systems in place to ensure high standards of compliance are constantly achieved.

Leading Australian Companies

Orrcon Steel and Metalcorp are businesses of BlueScope, so you can be assured to get quality from leading Australian companies that you can trust.

Metalcorp is known Australia-wide for our specialised rural steel products. We are the go-to supplier for farmers' steel needs across the country.

Why Choose Us

Orrcon Steel is a leading Australian distributor of Steel, Tube and Pipe.

Our extensive product range covers RHS, SHS and CHS structural tubular steel, hot rolled structural steel and a variety of fencing, roofing and building accessories.

Orrcon Steel supplies steel, tube and pipe to a diverse customer base including steel fabricators, furniture and trailer body manufacturers, housing and construction companies, pipeline and infrastructure engineering firms and more.

At Orrcon Steel we recognise that our success is derived from a flexible and nimble approach to market opportunities and our long-term success depends on our ability to meet or exceed the needs and expectations of our customers.

We also understand that the quality of our products, services and delivery performance is critical. With our Green Star Rating compliance we are a business for the future.

Tony's Message

“ I am proud to introduce our company and on behalf of all at Orrcon Steel and Metalcorp would like to share with you our values and aspirations that give an insight into how we operate. We understand that our future success is determined by the ongoing support and success of our customers. That support is dependent on us behaving honestly, ethically, reliably and with the best intentions in everything we do.

As part of the global BlueScope business, we are a proud member of the Australian and New Zealand steel industries, committed to the future health of the sector and supply of Australian made steel, seeking to contribute in a positive way in each community where we do business.

We are committed to operating our business in a safe environment, behaving honestly, openly and in a trustworthy manner. These are the cornerstones of successful business relationships. We serve our customers as individuals and seek to develop effective partnerships – offering our best endeavours, energy, passion and enthusiasm for doing what we do and seeking to do that exceptionally well. ”

Tony Schreiber
General Manager - Orrcon Steel

Tony

Our partnerships are built on strong business relationships

METALCORP **At Metalcorp, we're your Rural Brand for the Land**

Everything in Steel

Metalcorp is an institution in the Australian bush, dating back to the company's original incarnation from Ashley and Moore in 1967.

There has been mergers and rebranding of the business since that time with Ashley and Moore and M.I. Steel combining to form MI Steel in NSW and QLD. Metalcorp was formed from these two businesses and then purchased by the Smorgon Group in 2001 to then become part of the BlueScope group of businesses.

Ode to the Australian Farmer

**They rise and toil across a sun-burnt country, over pastures and plains,
of crops and cattle, they herd and tend,
they plough and sow, they cultivate and irrigate,
they feed and seed, with grit and will,
through thick and thin, they hold strong.**

Safe Farming Tick of Approval

Metalcorp's livestock handling equipment has received a safe farming tick of approval by the National Centre for Farmer Health.

A first for the rural sector, the independent report contains the results of Metalcorp's CLASSIC PLUS® Crush, CATTLEMASTER® Crush and the HOBBYMASTER® Crush, which were physically assessed.

The assessments were conducted by Livestock Veterinarian Dr David Rendell, Occupational Therapist Andrew Cross and NCFH Director Dr Susan Brumby to ensure Metalcorp's Cattle Crushes enable cattle and humans to work together as safely and efficiently as possible.

With Metalcorp's Cattle Crushes proven to effectively restrain the typical range of cattle in Australia, farmers are being urged to look for the safe farming tick of approval when purchasing their next Cattle Crush.

Metalcorp continues to support the National Centre for Farmer Health

Metalcorp is the Rural Brand for the Land, where links with the community is a key part

of the strength of the brand.

The National Centre for Farmer Health's vision is to make a difference to farmers lives by improving health, wellbeing (mental health) and safety on the farm.

Metalcorp supports the National Centre for Farmer Health, to enable them to continue their research work and provide health services to the rural farming community.

Platinum member of the Australian Lot Feeders Association
